

Managing Personal Storage Cabinets Conveniently from Your Smartphone or PC

Background

- ◇ An Australia based self-storage Company having expertise in renting space on a short-term & long-term lease to individuals (usually storing household goods) or to businesses (usually storing excess inventory or archived records).

Idea

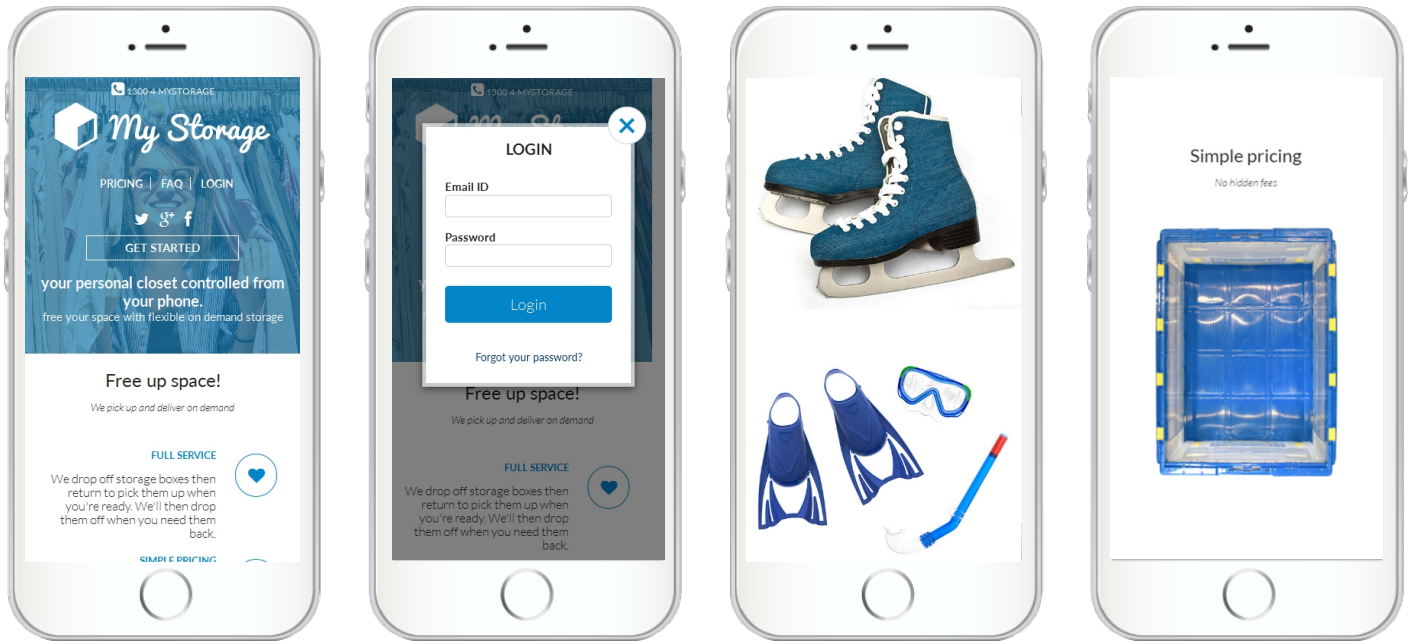

- ◇ Client wanted to develop a mobile responsive web solution which could be used by individual / business users to store physical goods.
- ◇ The consumer should also get a quick view of their stored goods.
- ◇ MyStorage team drops off empty boxes at user's door step to fill after confirming the order. The user then packs each box while using the app to catalog the items.
- ◇ MyStorage team picks up the boxes once it is ready.

Our Solution

- ◇ We developed a mobile responsive website that allowed users to schedule pickup / drop offs appointment.
- ◇ The MyStorage App allowed the users to record every item in the specific box. User could thus catalog the items to find it quickly later from various boxes.
- ◇ The system also kept a track of available spaces, rentals payments, reminders and notifications to be sent to users.

Technologies Used

- PHP
- HTML5, CSS3, Java Script
- Bootstrap
- Apache
- MySQL

About Mobile Pundits

Mobile Pundits is an ISO 9001:2008 Certified, leading provider of end-to-end Mobile Development & Testing solutions.

Since over 15+ Years now, Mobile Pundits' expert team has been helping our Clients with:

- ◇ Enterprise Mobility Strategy & Consulting
