Strata Management Fees

Client Business Description

◇ Provider of a SaaS based self-managed Strata Management System

OurBodyCorp
.com.au

Background

◇ Our Body Corp is designed to help owners self-manage their strata corporations online and save money.

◇ The SaaS tool manages agendas, minutes, finances and records, securely stored in the cloud and accessible anywhere 24/7. Added to this is a Facebook-style tool for owners to communicate with neighbours.

◇ They have clients across Australia signed up and using the system successfully for self-managed strata.

Challenge

◇ Getting a professional Strata Management Company to manage Strata can be expensive.

◇ In addition to that, even as a resident of the strata, you don't have much say in the management of your strata. There is not much transparency in how the money is being used and the value received doesn't equate to every penny spent.
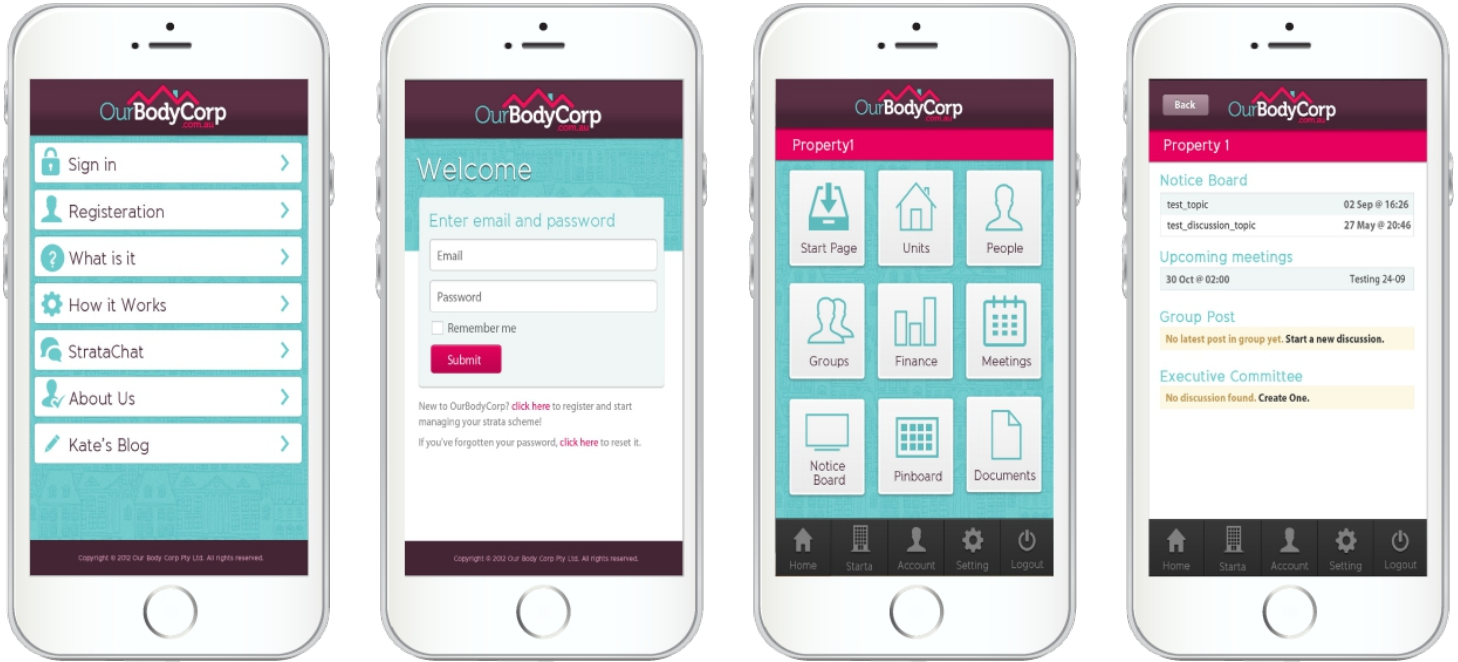

Idea

◇ To give control of strata in the hands of the residents and have a centralized location to store all the information related to the management of strata, which is accessible by all.

Our Solution

◇ Mobile Pundits developed a web based SaaS Platform to enable owners to self-manage their Strata.

◇ Portal lets the Strata Manager to organize meetings, create minutes and follow ups, manage budgets, manage community notice board, book a venue, chat through public or private forum rooms etc.

Technologies Used

- Java / Hibernate
- HTML 5 / JS
- MySQL
