

## Automating Inspections, Checklists and Surveys with Meaningful Analysis

### Client Business Description

- ◇ Walsh creates mobile & web software to automate your inspections and checklists.

### Background

- ◇ Walsh's Software - QA Inspector (QAI), Mobile Survey Solution (MSS), IC Hands Pro (ICH) & Rounds Tracker (RT) form a Product Suite to enable a healthcare facility to maintain compliance to various standards.

### Challenge

- ◇ As a 20 year old business, QAI / MSS / ICH & RT were developed separately without any relation to each other and hence it was difficult to sell multiple products to the same client as their data couldn't be reused and data analytics told an incomplete story.
- ◇ Applications were growing old and it was challenging to manage Win 6.5 / PocketPC versions.

### Idea

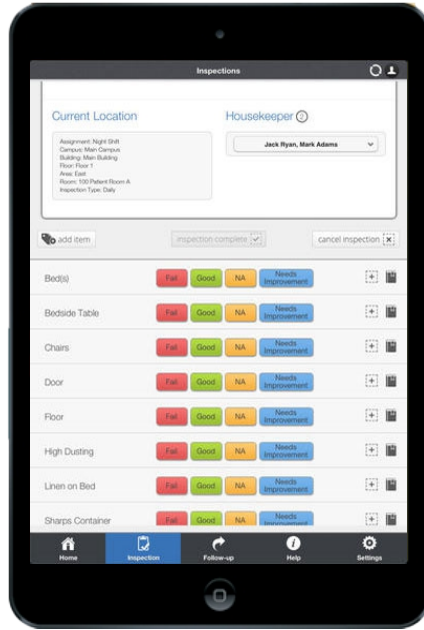

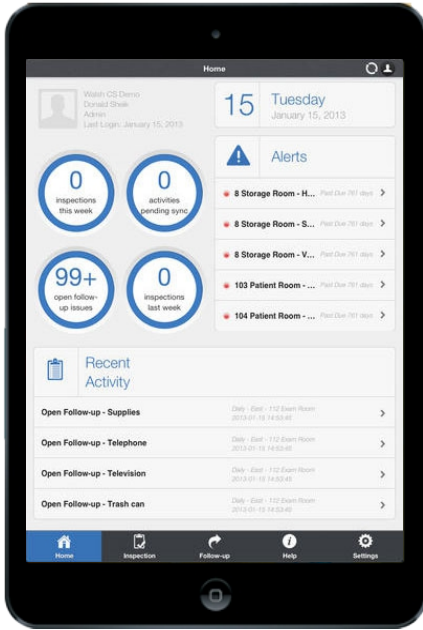

- ◇ Bundle different products on a common framework to deliver a SaaS based Application Suite customizable on the needs of a hospital or education / hospitality setup.

## Our Solution

- ◆ Developed QA Inspector (QAI), Mobile Survey Solution (MSS), IC Hands Pro (ICH) & Rounds Tracker (RT) as a Product Suite to enable a healthcare maintain compliance to various standards.
- ◆ Automated data synchronization / DIY Checklist Designer / work flow / incident capturing / follow-ups & reminders / supervisory control / dashboard overview in the Software that was built as iOS / Android Mobile Application (Smartphones & Tablets) with a multi-tenant SaaS backend.

## Technologies Used

- C#.NET / MSSQL
- iOS / Android
- SQLite
