

# Enabling Protection for E-Correspondence on iOS

## Client Business Description

- ◇ Outbound email services provider offering legal proof of deliveries for high value emails.

## Background

- ◇ RPost, (Registered Post), established the Registered Email system in 2000 to offer proof and protection for senders through electronic correspondence that is effective or flexible enough to use with any email address.
- ◇ RPost has filled this gap through its ability to legally verify precisely what email content and attachments were sent and received, by whom and when, in its simple service offering.

## Challenge

- ◇ Ability to use iPad & iPhone to mail clients directly with RMail services.
- ◇ Register RMail Native Application as a registered default handler within iOS for manipulating PDFs for signing, date-time stamping purposes.

## Idea

- ◇ Develop a native iOS integrated email / PDF handling application, which can be invoked from inbuilt default mail clients.

## Our Solution

- ◇ Developed RMail Registered Email® App to work with native iOS email client and with a valid RPost Registered Email account.
- ◇ Enabled Electronic Signatures by use of finger to sign contracts on screen, time-stamping, and rendering the contract tamper- detectable for valid legal records of contract execution.
- ◇ Managed Workflow by sending encrypted messages & contracts via registered email for recipient electronic signoffs.

## Technologies Used

- iOS
- RESTful Web Services

## About Mobile Pundits

Mobile Pundits is an ISO 9001:2008 Certified, leading provider of end-to-end Mobile Development & Testing solutions.

Since over 15+ Years now, Mobile Pundits' expert team has been helping our Clients with:

- ◇ Enterprise Mobility Strategy & Consulting
- ◇ Mobile Application Development
- ◇ Mobile Product Development
- ◇ Mobile Application Porting
- ◇ IoT (Internet of Things)
- ◇ Cross Platform Development
- ◇ Responsive Web Design & Development
- ◇ Mobile Testing

Our areas of expertise include:
